What is Sheerhabitat?

Sheerhabitat is a collection of imagery created by Andriana Cassimatis which is either printed or heat transferred onto a variety of materials, including fabric and photographic paper.

These materials then have a variety of application possibilities which aim to create functional art.

How does Sheerhabitat work?

Incorporating Sheerhabitat within your environment can be a simple 1-2-3 step process or can involve a complete customization of the product, depending on your needs.

Each image in the gallery is created in either a square, a semi-square, or a rectangle shape. In the product choices below, the sizes are determined, however custom sizes are available with an addition to the price.

Fabrics are created as panels of a specific size, not running yardage. The image does not repeat, therefore the smaller or larger the panel, the smaller or larger the image.

Simple 1-2-3 Step

Sheerhabitat offers a standard product line which combine the images in the gallery with a selected choice of material, size, and application.

Room Dividers / Wall Hangings

	Square	Semi-Square	Rectangle	Sheerhabitat has taken the most popular fabric and size to create a ready to hang room divider or wall hanging. Printed on the semi-sheer Georgette fabric, gallery images retain their vibrancy while still allowing light to pass through and illuminate the colors.

	\$235	\$290	\$455	

To order this product, choose an image from the gallery that matches the shape of the divider; either a square, semi-square, or rectangle.
